EDUCATION

University of Virginia **Charlottesville, Virginia**
Bachelor's in Computer Science *Aug 2026 – May 2028*

- **GPA**: 4.00/4.00

Northern Virginia Community College **Annandale, Virginia**
A.S.. in Computer Science & Engineering *Aug 2024 – May 2026*

- **GPA:** 4.00/4.00, 4x Presidential Scholar, *Dean's List*
- **Related Coursework:** Data Structures & Algorithms, Objects & Design, Computer Organization & Programming, Discrete Structures & Mathematics, Object-Oriented Programming, Multi-Variable/Calculus III

EXPERIENCE

Varsity Tutors **Manassas, Virginia**
Java Instructor *Feb 2026-Present*

- Improve student exam performance by 25% by delivering 1:1 tutoring in core Java concepts: **OOP**, **collections**, exception handling, **multithreading.**
- Reduce debugging time for students by 40% by guiding them with **code reviews**, **stack trace analysis**, and JVM memory/runtime behavior, and design patterns (e.g., Singleton, Factory).
- Increase assignment completion rates by 30% by designing practice on **data structures**, **algorithms**, and time/space complexity analysis, and coaching students through technical interview-style questions and coding exercises.

NoorTeck **Reston, Virginia**
Software Development Engineer in Test *Mar 2023 – Mar 2024*

- Participated in ten 2-week sprints, performing **regression testing**, **smoke testing**, **functional testing**, and **user acceptance testing**, leading to an 83% increase in quality of software releases
- Contributed to the development team in 2 sprints by seeding controlled defects into the software for the testing team to detect and report
- Utilized **Jenkins CI/CD** to set up automated jobs for the Smoke and Regression suites to trigger when a new build comes to the environment

PROJECTS

Software Test Automation Framework **Reston, Virginia**
Team Lead *Jan 2024 – Mar 2024*

- Built a hybrid test automation framework with **Java**, **Selenium** WebDriver, **Karate API**, and **Cucumber**, enabling UI, API, and database testing across frontend and backend.
- Utilized **JDBC** to cross-check UI and API test data against the database by connecting to **SQL** Server.
- Automated **CI/CD** and reporting with **Maven**, **Jenkins**, GitHub, **TestNG**, and Extent Reports, cutting regression and smoke suite execution time by 90.07% and providing detailed logs and visual reports.

Portfolio Website
Personal Project

- Built a single-page website using **JavaScript** and **React**, implementing client-side routing with **React Router** to support multiple views without page reloads.
- Styled and animated with **TailwindCSS**, and Configured a build pipeline with **Vite.**

E-Commerce Website
Personal Project

- Built a multi-page e-commerce website using **React** and **React Router** to enable client-side navigation across 5 pages.
- Integrated **REST APIs** to retrieve product data and submit user information, enabling dynamic content rendering.
- Improved application responsiveness by managing asynchronous data flow and state updates with **React hooks**.

SKILLS

Programming: Java, Python, JavaScript, HTML/CSS, SQL, Node.js, React.js, C#, Selenium, RESTAssured, Karate API, JDBC
Tools: Jenkins CI/CD, Maven, Vite, Git/Github, Postman API, Cucumber BDD, JUnit, TestNG, Jira, TailwindCSS, **Spring Boot**
